### In the course of Seastar relaunch, Dornier Seawings exhibits at MEBAA Show in Dubai

Wessling, Germany. 30 November, 2016: Dornier Seawings is preparing to exhibit at the annual MEBAA (Middle East Business Aviation Association) Show in Dubai from December 6<sup>th</sup>-8<sup>th</sup>, 2016. Dornier Seawings will showcase the advantages of its amphibious airplane, the Dornier Seastar CD2, as well as remind its audience what qualities the brand stands for.

The show is the ideal place for Dornier Seawings to connect with key clientele: VIP, corporate and governmental customers in the Middle East & Asian regions. The region has seen the demand for private business and luxury jets grow over the past three years at approximately 7% CAGR, confirming the importance of this market for Dornier's Seastar<sup>1</sup>. Peter Hermle, CEO of Dornier Seawings GmbH, notes, "MEBAA in Dubai will be a great outlet for us to address potential customers of the region with the advantages of the Seastar."

Although the plane's advantages are innumerable, there are key features important for the Middle Eastern & Asian markets which will be highlighted at the show:

- 1) **Non-corrosive:** unlike many competitors, the Seastar airframe is made of all-composite materials, making it ideal for the salty coastal waters of the region
- 2) **Accessibility:** because the plane is amphibious (capable taking-off and landing on water and paved terrain) it guarantees total accessibility throughout the region.
- 3) **Versatility:** the Seastar is available in customized packages for every type of client
- 4) **Stability:** due to the plane's unique seawings (sponsons), it not only has a low-center of gravity, it is capable of operating in choppy seas with up to 2 ft of waves

Dornier Seawings will also use the show to strengthen its brand image, reminding customers what the company stands for: ingenuity, value and tradition. With more than 100 years' experience in the aviation industry, Dornier stands for delivering high-quality, simple, yet effective solutions for a fair price, enabling the customer to benefit from low-operating costs and a high residual value.

Being an international company composed of Chinese and German partners, Dornier Seawings has the unique advantage of understanding a broader aviation market. Today, the company is working harder and faster than ever, to bring its customers the Dornier Seastar CD2, the world's most advanced amphibious aircraft.

Visit us at booth 384 in Dubai at the [MEBAA Airshow](#) on December 6-8, 2016 and spread the word on social media! #seastarcomingsoon #dornierseawingsontour #flyingtheseas
